LD-2500 - REFRIGERANT LEAK DETECTOR

PROVEN HEATED-DIODE SENSOR TECHNOLOGY RESISTS DIRT, WATER, OIL, AND OTHER CONTAMINANTS.

Equal sensitivity to CFC's, HCFC's, and HFC's eliminates resetting or switching for different refrigerants. Variable-intensity audible signal and single flashing led help pinpoint leaks. The automatic background compensation feature continuously monitors and automatically compensates for changing background "noise" without the need to manually adjust.

24 MONTH WARRANTY

Heated Diode Sensor

24 Month Replacement warranty

16 Hours of Operation from 2 D-cell Batteries
