

DM2 Digital Manifold

DD 2006
DEALER DESIGN
AWARDS
NEWS | **GOLD**

12 month
warranty

The DM2 Digital Manifold from JB Industries is the most intelligent manifold on the market. See for yourself why this is the must have tool for the serious contractor. Combining a superheat/subcooling gauge with a charging and testing manifold and a temperature gauge turns the DM2 into three tools in one.

The DM2 won the 2006 Gold Award for product design in the third annual ACHR Dealer Design Awards for the tools category. Calibration, calculation and conversion are automatic, thereby eliminating errors and ensuring that the technician charges correctly. The built-in capabilities make the DM2 low maintenance, accurate, and quick.

DM2-8 No hoses, two temperature sensors, and a case

DM2-5 One set of 60" (152cm) CCLE Kobra hoses, two temperature sensors, and a case

DM2-3 One set of 60" (152cm) CCLE Kobra hoses, one temperature sensor, one temperature clamp, and a case

DM4-3 4 valve manifold, one set of 60" (152cm) CCLE Kobra hoses, one temperature sensor, one temperature clamp, and a case

Heavy duty aluminum body features a sight glass and replaceable intake/hose holder fittings.

Display 32 refrigerants

Auto calibrate pressure to a zero at start-up

Measure Superheat, Subcooling, Temperature and Pressure

Available in four valve version

Gauges are pulsation proof and accurate up to 16,000 feet

Use the capabilities of any standard manifold

The DM2 has JB's famous full flow design for faster evacuation and charging.

Sleek new look and updated display for 2008

Heavy duty rubber for durability

Read Low, High, and Average instantly

made in the USA

JUST BETTER
