ROTHENBERGER
pipetool technologies at work

The partnership of ROTHENBERGER and JB brings together the best of German engineering and European craftsmanship with American distribution to create the highest quality tools in the HVAC/R marketplace. ROTHENBERGER tools are made of the highest quality materials and to the strictest quality standards to ensure that these tools will not fail when you need them the most. Backed by a 24 month over-the-counter warranty, JB and ROTHENBERGER are dedicated to standing behind their products. Get your hands on these tools to see for yourself why ROTHENBERGER tools are Just Better. We are proud to present our collection for your review. Should you not see a particular tool of interest, please contact us at 800.323.0811. The entire ROTHENBERGER product line can be viewed at www.jbind.com

ROMAX PRESSLINER **Cordless Press Tool**

High quality, battery powered press tool features a hydraulic drive and controlled, fully automatic pressing sequence for complete connections every time. The centrally balanced design makes the tool easy and safe to use in all positions, even overhead. The jaw fixture rotates 270° for working in tight spaces and angles. For use with copper and brass fittings up to 4" in diameter and connections for ASTM F1807 PEX tubing up to 1-1/4" in diameter.

ROMAX PRESSLINER **Compact Cordless Press tool**

The ROMAX Compact lightweight, battery-powered press tool weighs only 5.4 lbs and connects copper tube and fittings in about 6 sec. The slim profile allows one hand operation of the tool leaving the other hand free to hold and position the fitting. The 350° rotation of the jaw fixture and slim design easily reaches into tight spaces. When a press is complete, the jaws automatically release signaling the tool is ready for the next press.

Tube Bender Set

The ratchet feed of this tube bender is ideal for rapid, exact bending of small diameter soft copper and aluminum up to 90°. Designed for one hand operation, the compact design fits in even the tightest spaces. The open bending frame allows for the production of repeated alternate angled bends. Set includes bending tool, forms for 1/4", 5/16", 3/8", 1/2" and steel case.

MAXI Tube Bender Set

The smooth-running feed lever of this tube bender makes it ideal in restricted spaces and one-handed operations. The side lever allows for quick release and reset of bending former. The pliers feature a bayonet catch to easily change bending formers. The open bending frame makes it possible to repeatedly produce alternate angled bends. The set consists of the basic tool, bending support, bending formers and, and steel case.

ROBEND

For exact cold bending up to 180° of soft and hard copper, thin-walled coated copper, aluminum and brass, precision steel, and coated, seamless stainless tubes. Unique design provides bending without deforming the pipe. Guide shoes and formers are anti-stick for less friction and bending effort. Base plate can be attached to a vice for easy, free-hand bending. Set includes bending spray and steel carry case.

Tube Expander Kit

The high strength, forged aluminum body makes for lower weight and easy handling of our Expander set. The longer lever arms reduce effort and the automatic pin guide retracts for faster operation. The set includes expander with riveted expander heads in 3/8", 1/2", 5/8", 3/4", 7/8", and 1-1/8", internal/external deburring tool and steel case.

45° Flaring Tool

For making precise 45° flares on copper, brass, aluminum, and precision steel tubes up to 0.04" (1mm) in wall thickness. The special screw thread allows proper, efficient handling of material. The "Multiblock" multi-clamping calipers provide a firm, quick off-center clamping of the tube and automatic self-centering.

Tee Extractor Set

Extract your own tees on soft, semi-hard and hard copper or aluminum and save time and money saved on T-pieces. The ergonomic, compact design fits into the tightest spaces. The set includes tee-extractors for 1/2", 5/8", 7/8", and 1-1/8", ratchet handle, cam pincer, high-speed drill, and steel case.

Pipe Wrenches

Monoblock cast body with high strength, double T profile, these wrenches feature a forged jaw and hook, fine-polished teeth set against turning direction, anti-slip adjustment screw and spring supported hook. With features similar to the Heavy Duty style, the Aluminum Wrenches are made of high strength alloy and 40% lighter. Both styles conform to US standard GGG-W-651 Type 1 Class A (Class B for Aluminum.)

RO-GRIP

With a perfect grip and better leverage, our self-adjusting pliers offer many advantages over conventional pliers. Made of drop forged chrome vanadium steel, the rhombus-shaped jaws securely grab round, hex, sheets, and other shapes up to 1-5/8" OD

ROLOCK

Professional-grade water pump pliers with a jaw locking system providing a secure grip on round, square, or hex-shaped items with a push of a button. The ROLOCK has 14 groove opening positions with an opening capacity of 2-1/3"

Pipe Shears

For precise cutting of PVC, PP, PE, PEX, PB, and PVDF our pipe shears are the finest you can find. The quick release lever provides automatic opening of the blade at the push of a button. A double-sided stainless steel blade with v-shaped edges pierce the pipe to prevent deformation. The wide pipe rest ensures a square cut every time. A locking lever secures the blade during transport.

Pipe Slice

Cut tubes with less turns with this tube cutter. The self-clamping and self-alignment feature make readjustment unnecessary. Ideal for those hard to reach places. Made cast aluminum.

Mini Tube Cutters

Used for cutting copper tubes, these mini tube cutters have a large knurled knob and handy design to produce fatigue-free pressure control. The two guide rollers with recess assist with cutting close to flares.

Ratchet Tube Cutter

For copper, brass, aluminum, thin-walled steel, and plastic coated tubes, this ratchet tube cutter has a retractable internal deburring tool and a spare cutter wheel in the handle so they are always within reach. The ratchet telescopic guide with automatic spring-driven withdrawal allows for quick adjustment and fast opening.

Professional Tube Cutter

For tubes made out of copper, brass, and aluminum, this tube cutter features a retractable deburrer blade and a spare cutter wheel in the handle. The smooth adjustment knob allows for quick adjustment.

ROTRAC PLUS

New JB precision tube cutters for copper tube are manufactured by Rothenberger for JB and designed with smooth-running telescopic action for a consistent working radius. Features include a rolling stop which protects the cutter wheel, a protected screw spindle to shield against dirt and jamming, and a lightweight cast aluminum body. The retractable internal deburrer and spare cutter wheel in the handle are always within reach.

Deburring Tools

Internal/ External deburring tools for copper and plastic tubes
