

LDC-4000

COMBUSTIBLE GAS AND HC REFRIGERANT LEAK DETECTOR

The LDC-4000 intuitive technology features automatic calibration, one button operation and a long, flexible probe for easy access into hard to reach places. Long life, solid state heated sensor for combustible gas and HC refrigerants.

FEATURES

- Long life, solid state heated sensor for all HC refrigerants and combustible gases
- Sensitive to < 5 ppm of Methane
- Sensor life > 300 hours
- Automatic calibration and reset to ambient
- Comfortable rubber handle
- Intrinsically safe certified
- Low battery indicator
- Rugged carrying case
- Operates with four AA batteries (included)
- Certified by the Mine Safety & Health Administration (MSHA) to be safe in a combustible atmosphere
- 2 year warranty

PART NO.	DESCRIPTION
LDC-4000	HC refrigerant and combustible gas leak detector
LDC-4000-1	LDC-4000 Replacement sensor (4-prong)
LDC-4000-2	LDC-4000 Replacement sensor cover
LDC-4000-3	Combustible leak test vial
LDC-4000-4	LDC-4000 Carrying case
LDC-4000-5	LDC-4000 Instruction manual

DETECTS

Methane (R50)	Ethanol
Propane (R290)	Acetone
Isobutane (R600A)	Ammonia
Butane (R600)	Gasoline
Ethane (R170)	and more...
Acetylene
