

DV-FILTER

DIGITAL GAUGE REPLACEMENT FILTER

Replacing Filter

Step 1

Locate depressor and gasket inside sensor fitting. *Note: digital gauge sensor models with o-ring instead of gasket do not use the DV-FILTER.*

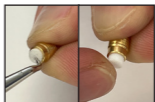

Step 2

Remove existing depressor and gasket with needle nose pliers.

Step 3

Remove soiled filter from depressor with o-ring tool. Insert new clean filter into depressor.

Step 4

Insert depressor with new filter and new gasket back inside sensor fitting (filter side in).

Step 5

Press firmly into place until depressor and gasket are securely seated.
