

Designed,
Engineered,
Manufactured
& Tested by
JB Industries
in Aurora, IL

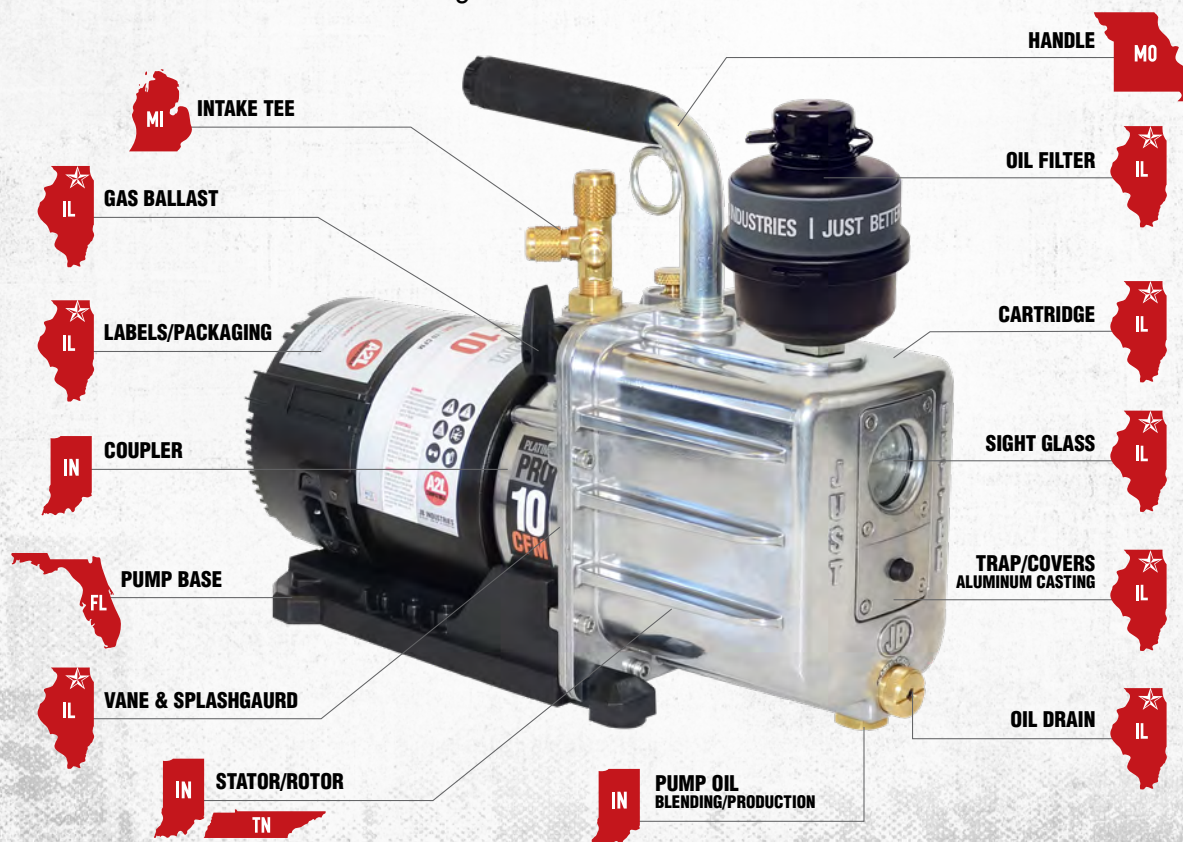

IT TAKES AMERICAN GUTS TO CHOOSE DOMESTIC SUPPLIERS FIRST.

At JB, building American-made starts with buying American-made.

We don't chase the cheapest option. Wherever possible, we partner with U.S. suppliers who deliver on time, build with integrity, and share our commitment to quality. Our brass and aluminum forging houses have had our back for over 50 years. Standing up to "Big Import" means backing local economies and keeping American machines running.

From Raw Materials to Machined Guts.

At our Aurora, IL factory, we machine raw materials such as brass into the guts of our American-made tools, and fine-tune select components from trusted local suppliers to precise JB standards.

AC Motors – U.S. Motors (Made in Mexico under NAFTA)

DC Motors – Sourced from South Korea due to limited U.S. availability. We prioritize domestic sourcing whenever possible and continue to advocate for U.S.-based production.
